

AASHA FURNITURE

Invoice, Billing & Tax Policy

Controlled test-business document. Aasha Furniture is a synthetic business profile created for Agent Flux end-to-end verification. Product, customer, tax-registration, bank, contact and transaction identifiers in this package are test data and must not be treated as real-world credentials or legal records.

1. Invoice requirements

Each invoice must have a unique invoice number, invoice date, seller/business identity, customer identity, line items, taxable value, discount where applicable, GST, total, amount paid, balance due and payment terms.

2. Controlled test tax configuration

For this Agent Flux test environment, the catalogue uses a configurable 12% GST rate. This is test configuration only; it is not a statement of the actual GST classification or rate applicable to any real Aasha Furniture business.

3. Numbering

Use a deterministic, unique invoice sequence such as AF-INV-2026-0001. The application must prevent duplicate invoice numbers under concurrent execution.

4. Calculation example

Taxable value ■44,500; test GST 12% = ■5,340; total = ■49,840. The financial engine must perform this calculation and preserve the component values.

5. Credit/debit notes

Any post-invoice financial adjustment must use a controlled credit/debit-note process and must not silently mutate the original invoice total.
