

# AASHA FURNITURE

## Payment, Credit & Reconciliation Policy

**Controlled test-business document.** Aasha Furniture is a synthetic business profile created for Agent Flux end-to-end verification. Product, customer, tax-registration, bank, contact and transaction identifiers in this package are test data and must not be treated as real-world credentials or legal records.

### 1. Standard payment terms

Standard made-to-order furniture: 50% advance at order confirmation and 50% balance before delivery.

Credit terms are not standard and require Finance approval.

### 2. Accepted payment methods

Bank transfer, UPI and other payment methods explicitly enabled by Finance. A payment is not considered reconciled solely because a customer claims to have transferred money.

### 3. Payment states

| Status         | Meaning                             |
|----------------|-------------------------------------|
| PENDING        | Payment expected but not verified   |
| RECEIVED       | Payment received and recorded       |
| RECONCILED     | Payment matched to invoice/order    |
| FAILED         | Payment attempt failed              |
| REFUNDED       | Previously received amount returned |
| PARTIALLY_PAID | Invoice has an outstanding balance  |
| PAID           | Invoice balance is zero             |

### 4. Credit controls

Credit customer eligibility, limit and payment terms must be stored as explicit business data. Agent Flux must not infer credit eligibility from conversation alone.

Orders with unpaid balances may be blocked from further production/delivery according to the collection policy.

### 5. Idempotency

A payment transaction reference must not create duplicate payment records. Repeated webhook/message delivery for the same transaction must be safely ignored or reconciled to the existing payment.
