

AASHA FURNITURE

Returns, Cancellation & Refund Policy

Controlled test-business document. Aasha Furniture is a synthetic business profile created for Agent Flux end-to-end verification. Product, customer, tax-registration, bank, contact and transaction identifiers in this package are test data and must not be treated as real-world credentials or legal records.

1. Cancellation before production

Customer may request cancellation before production begins. Finance calculates any refundable amount based on payments received and documented non-refundable charges, if applicable.

2. Cancellation after production begins

Custom or made-to-order items may incur material and production costs. Operations must confirm the production state and Finance must calculate the eligible refund. Management approval is required for exceptions.

3. Damaged or defective product

Customer reports should be linked to the order. Operations investigates whether the issue is transit damage, manufacturing defect, installation issue or customer-caused damage. Resolution may include repair, replacement or refund according to the approved decision.

4. Refund controls

Refunds must reference the original payment and invoice. Duplicate refunds are prohibited. Refund approval thresholds follow the Approval & Governance Matrix.

Finance records refund status and transaction reference; the original invoice remains immutable and any accounting adjustment is represented through the controlled adjustment process.

5. Customer communication

Customer must receive confirmation when a cancellation/refund request is received, when it is approved/rejected, and when the refund is processed.
