

AASHA FURNITURE

Discount & Price Override Policy

Controlled test-business document. Aasha Furniture is a synthetic business profile created for Agent Flux end-to-end verification. Product, customer, tax-registration, bank, contact and transaction identifiers in this package are test data and must not be treated as real-world credentials or legal records.

1. Standard discount authority

Discount on taxable value	Approval authority
0%–5%	Sales Executive
>5%–10%	Sales Manager
>10%–15%	Owner
>15%	Not permitted as standard discount; Owner must explicitly approve an exception

2. Additional rules

Discount is calculated on eligible product/service value before GST.

Discount cannot be used to alter GST calculations.

Multiple discounts must be evaluated on the final effective discount, not simply added together.

Sales users cannot approve their own exception discounts.

Any price override not represented as a documented discount requires Manager/Owner approval based on the value and risk.

3. Agent Flux decision rule

At quotation generation, calculate the effective discount. If approval is required, pause the workflow at APPROVAL_REQUIRED and create an approval record before the quotation is released to the customer.
