

AASHA FURNITURE

Delivery & Installation Policy

Controlled test-business document. Aasha Furniture is a synthetic business profile created for Agent Flux end-to-end verification. Product, customer, tax-registration, bank, contact and transaction identifiers in this package are test data and must not be treated as real-world credentials or legal records.

1. Scheduling

Operations schedules delivery after production and quality checks are complete and payment conditions are satisfied.

Customer delivery date is a target until Operations confirms a delivery slot.

2. Delivery completion evidence

Record delivery date/time, delivery address, responsible delivery person, customer confirmation and installation completion where applicable.

3. Failed delivery

If delivery fails because the customer is unavailable or access is not possible, the order moves to DELIVERY_RESCHEDULE_REQUIRED and a new slot must be confirmed.

4. Damage reporting

Visible transit damage must be recorded before installation is completed. The issue must be linked to the order and escalated to Operations for resolution.
